

RISHABH PRAKASH

Full Stack Developer (MEAN / MERN) with Generative AI | 6.5+ Years of Experience

Email: rishabh.prakash42@gmail.com | Phone: +91 9031981371 | Location: Gurugram, Haryana, India

LinkedIn: www.linkedin.com/in/rishabh-prakash-76636aa6 | Portfolio: rauni-rishabh.github.io

PROFESSIONAL SUMMARY

Innovative Full-Stack JavaScript Developer with 6.5+ years of experience designing high-performance enterprise applications on MEAN and MERN stacks. Specialize in building Generative AI solutions using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Agentic AI workflows, and Azure OpenAI integrations alongside scalable React and Angular frontends, robust Node.js / NestJS backends, and cloud-native deployments on Microsoft Azure. Proven track record in leading cross-functional teams, mentoring 20+ developers, and delivering production-ready software in Agile / Scrum environments. Microsoft Certified Azure AI Engineer Associate.

TECHNICAL SKILLS

Generative AI / LLMs	Generative AI, Large Language Models (LLMs), GPT-4, Claude, Gemini, Retrieval-Augmented Generation (RAG), Semantic Hybrid Search, Vector Databases, Embeddings, Prompt Engineering, Agentic AI, MCP, Azure AI Search
AI Platforms & Tools	LangChain, LangGraph, LlamaIndex, Azure AI Studio, Vertex AI, OpenAI API, Claude AI, Gemini, GitHub Copilot, Claude CLI
Frontend	React.js (16+), Angular (17+), TypeScript, JavaScript (ES6+), Redux, Zustand, Tailwind CSS, HTML5, CSS3, SASS
Backend & APIs	Node.js, Express.js, NestJS, Python, FastAPI, RESTful APIs, Socket.IO, JWT, RBAC
Cloud & DevOps	Microsoft Azure, AWS, Azure Blob Storage, CI/CD, Azure DevOps, Git, Bitbucket, Postman
Data & System Design	MongoDB, Neo4j, Microservices, Serverless Architecture (AWS Lambda, Azure Functions), Event-Driven Architecture, High-Level Design (HLD), Low-Level Design (LLD), Load Balancing, Fault Tolerance, CQRS, SOLID Principles, Clean Architecture
Leadership & Collaboration	Team Leadership, Mentoring, Code Review, Technical Interviews, Cross-Functional Collaboration, Agile / Scrum, Sprint Planning, Stakeholder Communication

WORK EXPERIENCE

Senior Software Developer - Full Stack with Generative AI	Infosys Limited
<i>November 2023 – Present</i>	

- Owned the design and deployment of an enterprise-grade, AI-powered Knowledge Management Assistant using Azure OpenAI (GPT-4), Azure AI Search, and RAG, improving enterprise document retrieval efficiency and reducing manual search effort across business workflows.
- Designed a scalable RAG pipeline with semantic + vector hybrid search, optimizing retrieval accuracy and minimizing hallucinations in LLM responses.
- Designed systems processing large-scale enterprise document datasets (10,000+ documents) with optimized indexing and retrieval latency.
- Engineered distributed microservices using Node.js / NestJS and Python / FastAPI, enabling independent scaling and handling high-concurrency enterprise workloads.
- Designed and implemented near real-time data ingestion pipelines ensuring fault tolerance, consistency, and efficient indexing of large document datasets.

- Built scalable React and Angular (14+) applications with optimized rendering and modular architecture, improving performance and maintainability.
- Designed and implemented a multi-agent solution for SDLC automation, driving an approximately 80% increase in overall productivity.
- Led a team of 5–6 developers in adopting GitHub Copilot Agent with MCP tooling, automating code generation, review, and task orchestration, significantly boosting team productivity and reducing delivery cycle times.

Software Developer - Full Stack

Quantiphi Analytics Solutions

June 2021 – November 2023

- Developed scalable full-stack applications using Angular, React, Node.js, and MongoDB, supporting enterprise-grade, high-traffic systems.
- Designed and implemented FastAPI-based microservices for ML workflows, enabling modular architecture and independent service scaling.
- Optimized data processing pipelines and API interactions, significantly reducing latency for ML-driven responses.
- Improved frontend performance using lazy loading, code splitting, and bundle optimization, enhancing user experience and load times.
- Engineered high-concurrency backend systems capable of handling 10,000+ concurrent requests, ensuring low latency and system stability under peak enterprise-scale traffic.
- Mentored 20+ developers and conducted technical interviews, improving team productivity and onboarding efficiency.

Software Developer

FreeElective Network Pvt. Ltd.

July 2019 – May 2021

- Developed responsive Angular applications from scratch, delivering scalable and user-friendly web experiences across devices.
- Designed and implemented backend systems using Node.js and Neo4j, enabling efficient graph-based data modeling and querying.
- Led Angular migration from v8 to v10, reducing technical debt and improving application maintainability with zero downtime.
- Managed production deployments, server configurations, and traffic routing, ensuring high availability and system stability.

EDUCATION

Master of Computer Applications (MCA)

National Institute of Technology, Calicut

2016 – 2019

CERTIFICATIONS

- Microsoft Certified: Azure AI Engineer Associate (AI-102)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Infosys Certified Professional - Generative AI
- MEAN Stack Developer
- MongoDB Basics

AWARDS

- Rookie of the Quarter – Infosys
- Synergetic Perfection Award – Quantiphi
- Justice League Award
- Think Tanker Award
